

**Predictability  
in the present.**

**Sustainability  
for the future.**

Hydro realizes that reliability is a fundamental element of corporate sustainability. That is why we have invested in the people, processes, and technology necessary to increase your reliability and decrease your cost of operation.

Hydro's Centaur wireless condition monitoring service fits this vision by providing an easily deployed solution for identifying and eliminating potential equipment problems.

**Sustainable  
Growth**

- **Remain competitive** by reducing equipment-driven costs
- Increase **production uptime** and **process quality**
- Develop proactive maintenance strategy that **reduces risk** and **uses labor efficiently**

**Environmental  
Stewardship**

- Optimize operation to **reduce energy** and **water consumption**
- Greatly reduce risk of **hazardous material release**
- **Minimize resource usage** and **carbon footprint** by calibrating maintenance frequency based on real data

**Worker Safety  
& Satisfaction**

- Eliminate encounters with **hazardous environments**
- Promote **teamwork** and **workplace happiness** by developing cohesive strategy in place of reactive activities
- Digitize and automate repetitive tasks so workers can focus on **higher level risk management**
